

PORTFOLIO • ESTABLISHED 2026

Sheryl B. Masilang

A Quantity Surveyor & Coordinator built on discipline, integrity, and absolute cost precision – keeping your projects profitable and on schedule.

📍 Lipa City, Batangas, Philippines

● AVAILABLE FOR REMOTE/ HYBRID/ ON-SITE WORK

About Me & Career Story

7+ Years Engineering Expertise, *refined* – from first estimate through closeout.

THE HOOK: BS Civil Engineering graduate & COSH Certified Safety Officer with over 7 years of combined expertise in quantity surveying, cost estimation, and structural steel coordination.

THE STORY: From managing hands-on steel fabrication plant workflows at DMCI to serving as Quantity Surveyor for a **\$12M USD** 21-story high-rise tower at Itapinas and freelancing works, I provide accurate and detailed estimates based on architectural drawings, structural plans, and project specifications to help developers, contractors, subcontractors, and builders prepare competitive bids and effectively manage project costs. Using industry standard methods and advanced estimating tools like Planswift and Bluebeam, I deliver precise calculations that reduce errors and improve project profitability.

THE PROMISE: Meticulous material measurements, zero-tolerance budget discrepancies, prompt submittals, and effective multi-stakeholder communication.

"I bridge the gap between commercial accuracy and proactive project execution. By refining estimates and transforming reactive coordination into streamlined workflows, I bring complete ownership to every phase—delivering seamless QS and coordination across time zones with the same presence as on-site leadership."

What I Deliver

Quantity Take-Offs

Precise material take-offs from structural, architectural, civil, and basic MPFS drawings using Planswift and Glodon 5D BIM.

DUPA & BOQ Formulation

Formulating Detailed Unit Price Analysis (DUPA), Bill of Quantities (BOQ), and Bill of Materials (BOM) for pre-bid and active builds.

Structural Steel QS

Measuring exact quantities for hot-rolled sections, cold-formed steel, decking, bolts, weld lengths, and bar bending schedules.

Contract Admin & Audits

Evaluating progress billings, variation/change orders, purchase requisitions, and conducting routine site audits.

Projects Handled/Involved

21-Story Mixed-Use Building (\$12M USD)

Role: Jr. Quantity Surveyor | Itaipinas Development Corp.

Problem: Handling site-level QS across pre-construction, active construction, and handover for a green high-rise tower with strict cost controls.

Solution: Executed detailed quantity take-offs, formulated BOQ/BOM, evaluated change orders, and audited installed materials against approved blueprints.

Result: Minimized material wastage while successfully delivering full financial oversight and contractor billing verification through project handover.

\$200K Warehouse Project (QTO) and BOQ in New Zealand

Contractor's initial amount

FINAL AMOUNT:

Agreed amount based on my evaluation

Change Order Evaluation based on the contractor's submitted proposal that resulted in a reduction of approximately 31% from the initial amount.

Prepared by:

Sheryl B. Maslang
Jr. Quantity Surveyor

Engr. Delfino Dela Peña
Construction Manager

Project Manager

Conforme:

Project Manager

The evaluated amount reflects the quantities and applicable rates determined based on the reviewed scope of work, supporting documentation and an actual site inspection.

Request for Approval (RFA), Request for Information(RFI) and Purchase Requisitions (PR) MONITORING

Track Record By The Numbers

7+

Years Field & QS Expertise

Key Metrics of Impact

- ★ **\$12M+ Valuation:** High-rise project financial oversight through final handover.
- ★ **50+ Steel Packages:** Tender take-offs and fabrication coordination for heavy steel structures.
- ★ **\$100k - \$300k:** International freelance QS estimations for Australian residential & commercial projects.
- ★ **100% Safety Compliance:** Certified COSH Safety Officer 2 (SO2) standards maintained.

Services & Engagement Models

Service Package	Pre-Bid Estimation	Active Cost Control	Full Project QS
Primary Scope	BOQ, BOM & Quantity Take-Offs	Progress Billing & Change Orders	End-to-End Financial & Site QS
Core Deliverables	Planswift and Bluebeam	DUPA & Variation Evaluation	BOQ, Site Audits, Submittal Track
Contract Management	Pre-tender bid review	Supplier quote validation	Full Contractor & Client Liaison
Target Client	Subcontractors & Bidders	General Contractors	Property Developers & Steel Firms

Technical & Engineering Tools

5D BIM & Take-off

- Planswift & Bluebeam
- Glodon Cubicost (5D BIM)
- AutoCAD
- Revit & SketchUp

Costing & Analytics

- Primus Costing
- Advanced MS Excel (Macros/DUPA)
- Procore System
- MS Office Suite

Safety & Compliance

- COSH Certified (SO2)
- Site Material Quality Auditing
- Specification Compliance
- Submittal Control

I am highly adaptable and a fast learner. Should you require any other software, I am more than willing to train and learn how to use it.

Let's Work Together

Book a discovery call to discuss your upcoming construction or structural steel projects.
